ORBIT INTERNATIONAL CORP. POWER UNIT  
SEGMENT RECEIVES NEW ORDER TO  
SUPPORT ROYAL AUSTRALIAN AIR FORCE PROGRAM

Hauppauge, New York, April 24, 2002—Orbit International Corp.(NASDAQ:ORBT) today announced that its Power Unit Segment, Behlman Electronics, Inc., has received an order from BAE Systems for approximately \$340,000 for a display power supply to be used in the Royal Australian Air Force's Wedgetail Program, a 737-700 airborne early warning and control (AEW&C) system. The Wedgetail Program is the Royal Australian Air Force's new AEW&C system that has complete interoperability with the E-3 and 767 AWACS aircraft surveillance systems. The order calls for design and delivery of five (5) qualification units in September 2002 and production deliveries to commence in January 2003.

Mark Tublisky, President of Behlman Electronics Inc. commented, "We are pleased to have received this order from BAE Systems after having previously supplied power supplies to this customer on other programs. In addition to this order, Behlman is currently pursuing separate program requirements with BAE to design and build two power supply configurations for the Wedgetail system".

Dennis Sunshine, President and CEO of Orbit commented, "Behlman's Custom Power Division has seen enormous growth in bookings over the past 18 months for orders for its Commercial Off-The-Shelf (COTS) solutions for customer power requirements. In addition to this order from BAE, the Custom Power Division has recently booked significant orders from Raytheon and the U.S. Government that could include potential follow-on production requirements. Furthermore, Behlman is continuing to build upon its reputation as a leader in COTS solutions, which should lead to continued growth in our Custom Power Division".

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Its Behlman Electronics, Inc. subsidiary manufactures and sells high quality commercial power units and low noise uninterruptable power supplies (UPS). The Behlman custom division designs, manufactures and sells power units and electronic products for measurement and display. For a more detailed discussion of the risks inherent in the Company's business the reader is referred to the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2001.

This press release contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including delivery dates of current orders, additional opportunities on

the Wedgetail system, future orders for its COTS solutions to power requirements, continued growth of its Custom Power Division, and potential follow-on production requirements. These forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause the actual future results of the Company to be materially different from such forward looking statements. Factors that might result in such differences include, without limitation, the current economic recession and military conflict, variable market conditions and changing needs of the defense sector and the Company's customers. The forward-looking statements contained in this press release speak only as of the date hereof. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in the Company's reports and registration statements filed with the Securities and Exchange Commission.
