ORBIT INTERNATIONAL'S POWER UNIT SEGMENT
RECEIVES \$500,000 IN NEW ORDERS

Hauppauge, New York, October 31, 2002—Orbit International Corp. (NASDAQ:ORBT) today announced that its Power Unit Segment, Behlman Electronics, Inc., has received orders totaling in excess of \$500,000 for its Custom Power Division. Deliveries under these contracts are expected to commence in the first quarter of 2003 and be completed by the end of that year.

One of the contracts received is for \$280,000 for a High Voltage power supply used on the F-14 Tomcat aircraft. Behlman continues to be a major supplier of spares for both the F-14 and F-18 aircraft and is continually working with the U.S. Government on reverse engineering of power supplies that have become obsolete, but are still critical to the maintenance of the Navy's aircraft.

The Company also received an order for a display power supply to be used in the Royal Australian Air Force's project Wedgetail, a 737-700 airborne early warning and control (AEW&C) system. This is the second order Behlman has received this year for a power supply to be used in the Wedgetail System.

Finally, Behlman has received an order for power supplies used in the British Royal Air Force's Nimrod maritime patrol aircraft. Behlman has been previously supplying these units and expects other additional orders in the future.

Dennis Sunshine, President and CEO of Orbit commented, "Behlman's Custom Power Division has seen enormous growth in bookings over the past two years. Major defense contractors are choosing Behlman for its Commercial-Off-The-Shelf (COTS) power solutions and reverse engineering capabilities. We believe our reputation as a leader in these areas combined with our strong customer relationships will lead to continued growth in the future."

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Its Behlman Electronics, Inc. subsidiary manufactures and sells high quality commercial power units, AC power sources, frequency converters, uninterruptible power supplies and associated analytical equipment. The Behlman custom division designs, manufactures and sells power units and electronic products for measurement and display. For a more detailed discussion of the risks inherent in the Company's business the reader is referred to the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2001.

This press release contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including the expected deliveries of new orders, the potential for future orders from the British Royal Air Force for Behlman's products and the ability of the Company's customers to recognize the advantage of its COTS solutions and reverse engineering capabilities that will lead to continued growth. These forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause the actual future results of the Company to be materially different from such forward looking statements. Factors that might result in such differences include, without limitation, the current economic climate and military conflicts, variable market conditions and changing needs of the defense sector and the Company's customers. The forward-looking statements contained in this press release speak only as of the date hereof. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in the Company's reports and registration statements filed with the Securities and Exchange Commission.
